Platform integrations

Industry classification

NACE 46494 - Muu erikoistunut harrastusvälineiden tukkukauppa

Partner review context

The public website gives platform partners, suppliers, marketplaces, payment providers and due-diligence teams a clear reference point for the operating brand, legal identity, service scope and commercial focus.

Security and governance

Operational systems use unique service accounts to minimise cross-service access risk. MGG only collects and stores data needed to provide services, and public pages keep sensitive implementation details outside public materials. Security concerns can be reported through the public contact form by selecting Security report.
